# Traffic problem in YOKOHAMA

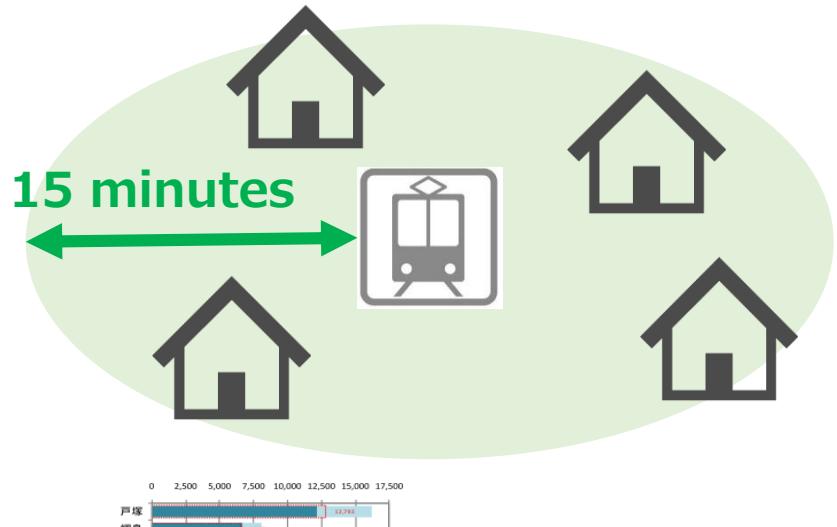

## Congestion

Hodohaya bypass

- Average speed at commuting is lower than national average.
- Hodogaya bypass is famous for heavy congestion.

## 15-minute walk from station

## Community Cycle (Bay-Bike)

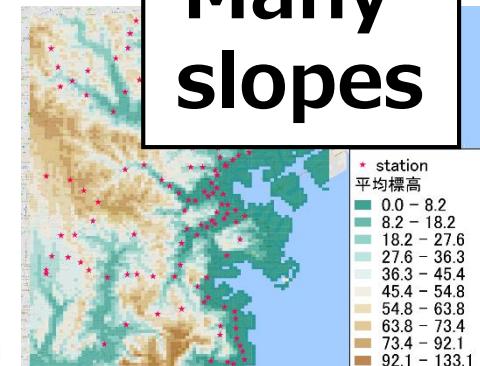

- People can use cycle!
- With electric assist!
- Dedicated park.

## Park is full

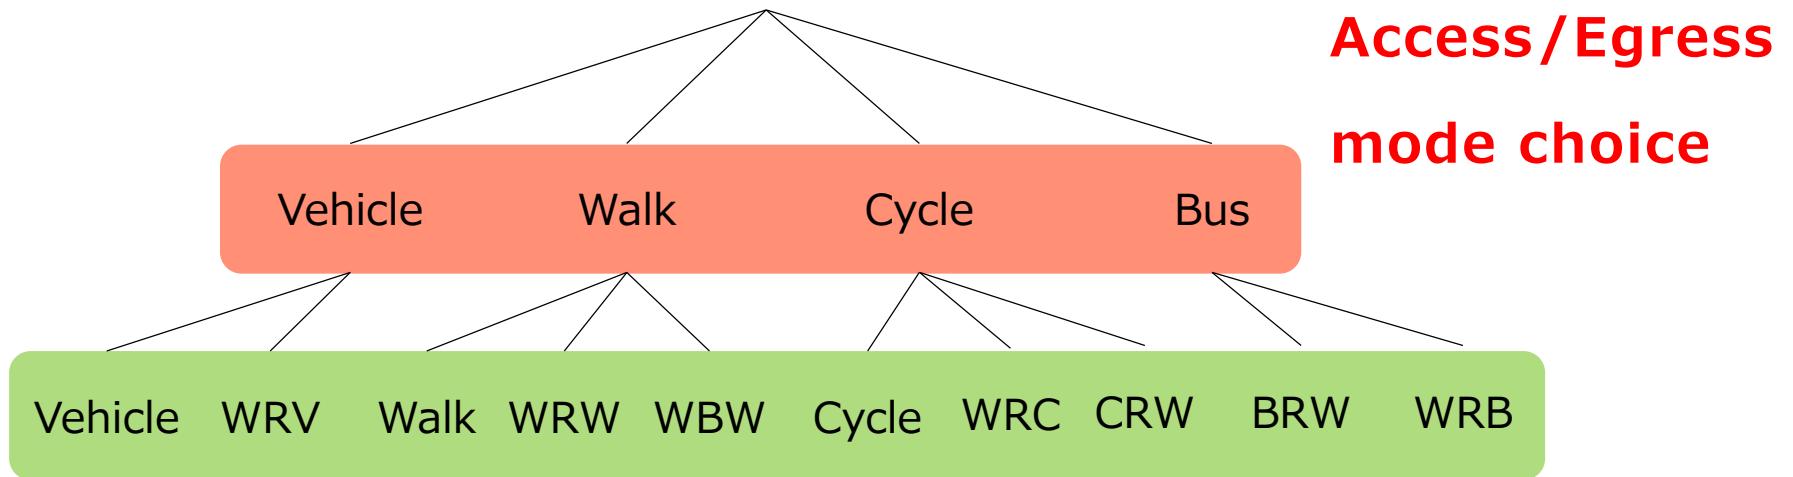

収容台数上位30駅  
の駐輪場利用状況

- Cycle and Bus remain in doubt.

- The signs of parameters is reasonable.

- Decision-making tree should be improved.

# Analysis Area

Assign PT-data (Before Policy & Transportation:Car)

Policy Target Road

- The third Keihin Road

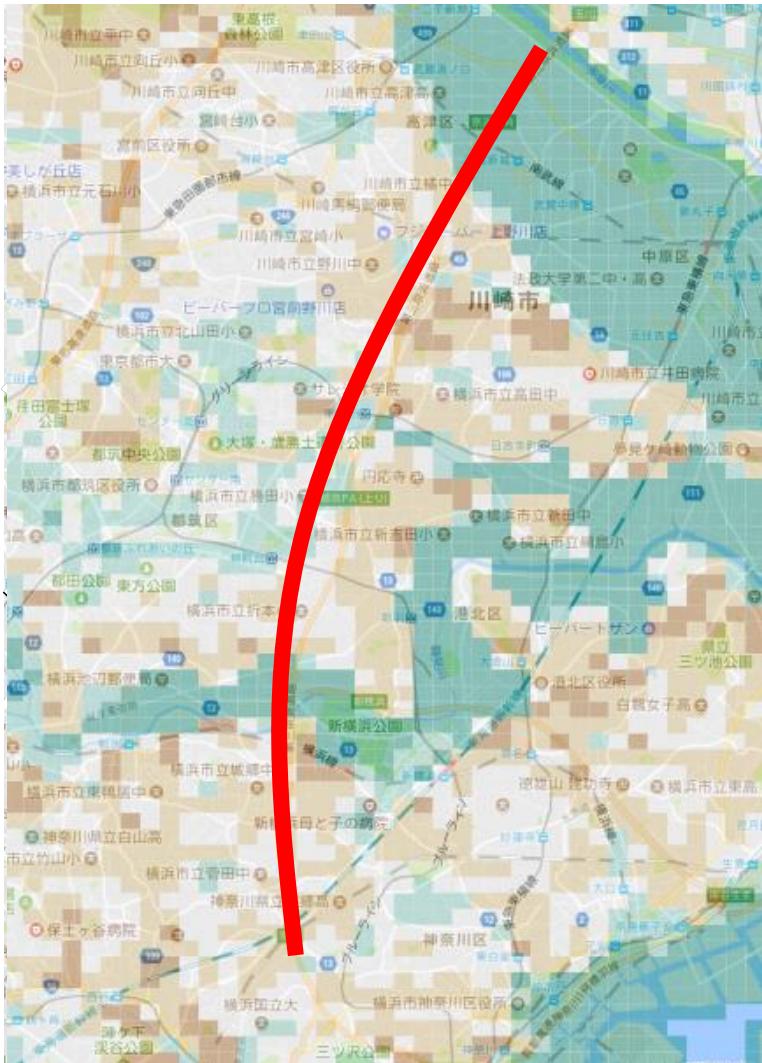

[http://www.geocities.jp/nocty\\_bypass/gazou/douro/3\\_kantou/R466/R466-5.jpg](http://www.geocities.jp/nocty_bypass/gazou/douro/3_kantou/R466/R466-5.jpg)

- Prefectural Road 21

<http://tossy.road.jp/gallery/03121406-2.jpg>

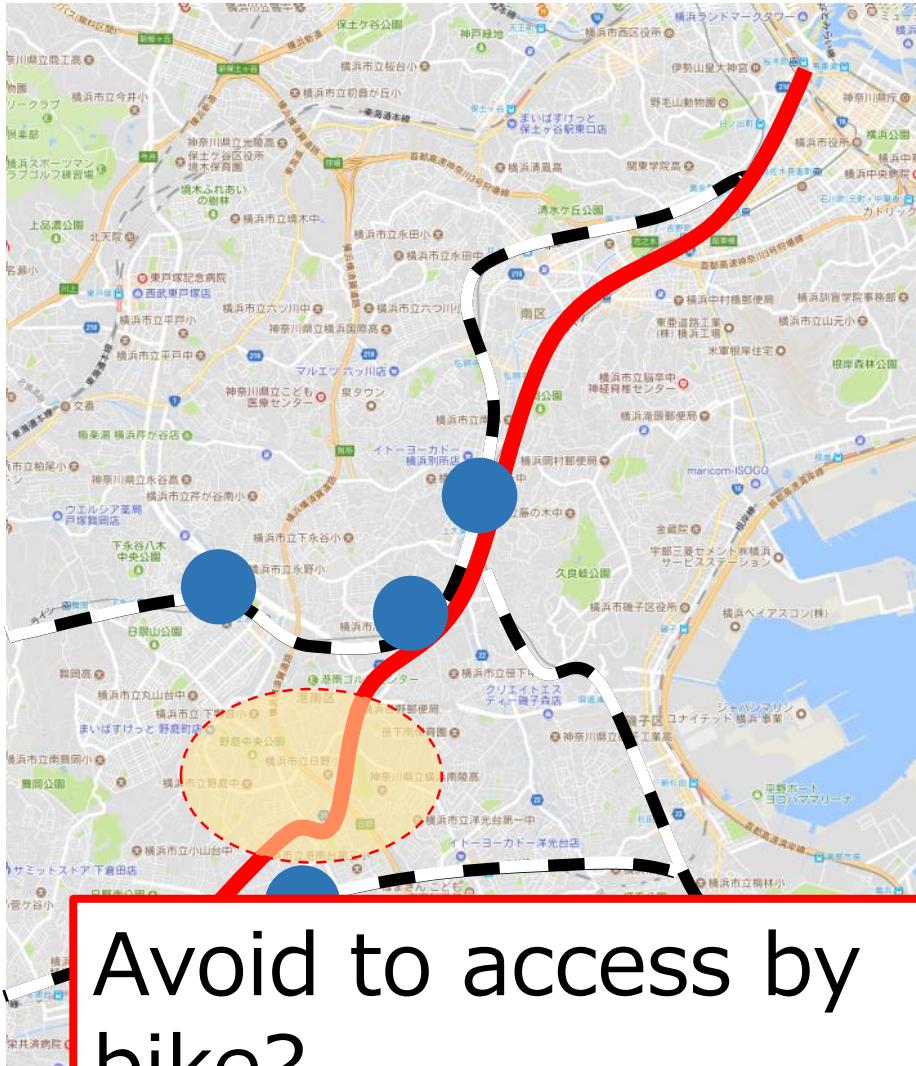

# Analysis Area

## 1st Target Area The Third Keihin Road

- Heavy Traffic in simulation
- Location of Station
- Many Slopes

# Analysis Area

## 2nd Target Area Prefectural Road 21

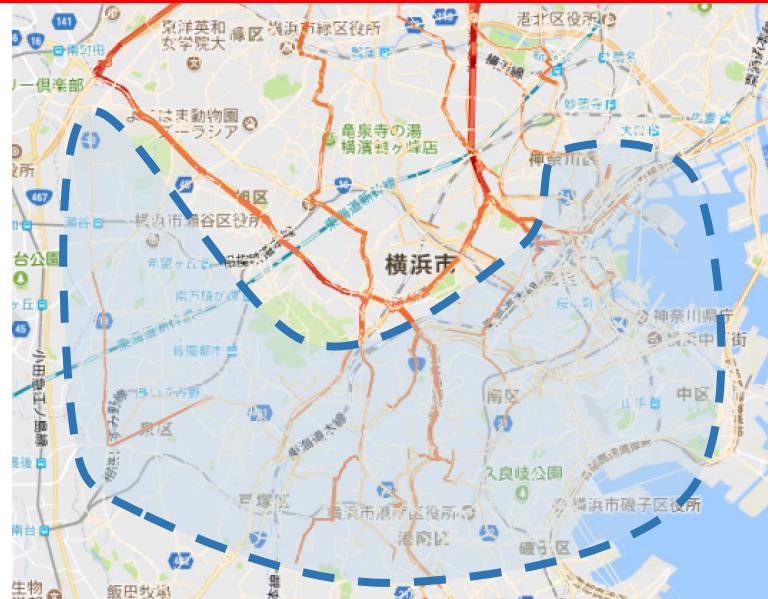

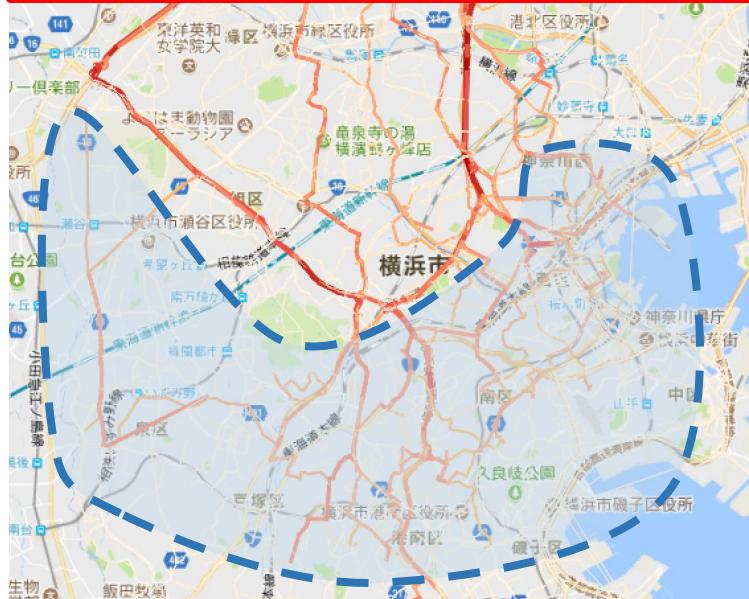

- Traffic in simulation
  - Location of Station
  - Many Slopes
  - Illegal Bycycce Parking
- :Station(Illegal Park)

# Result

- Impact of Policy on a Whole Network

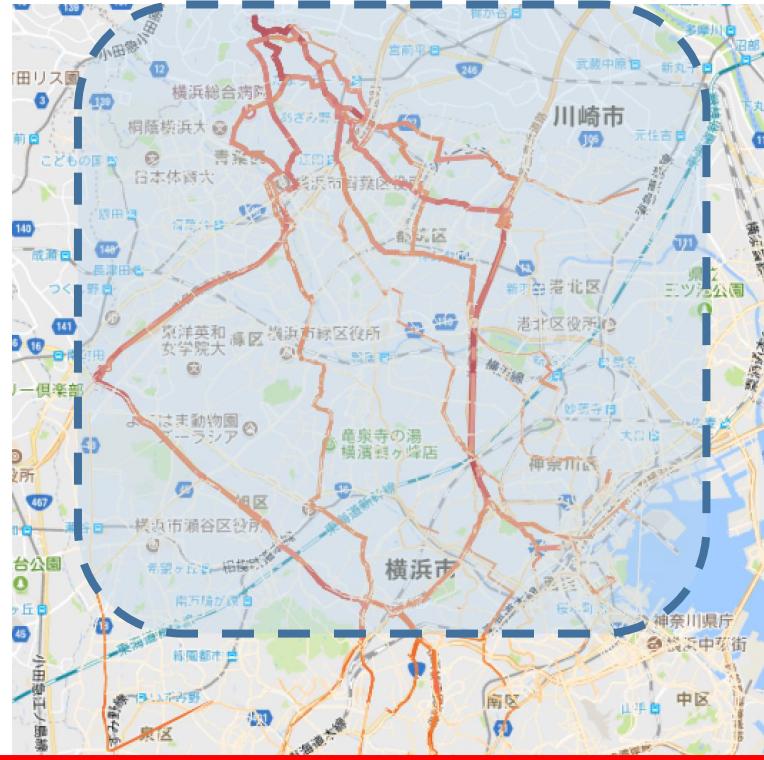

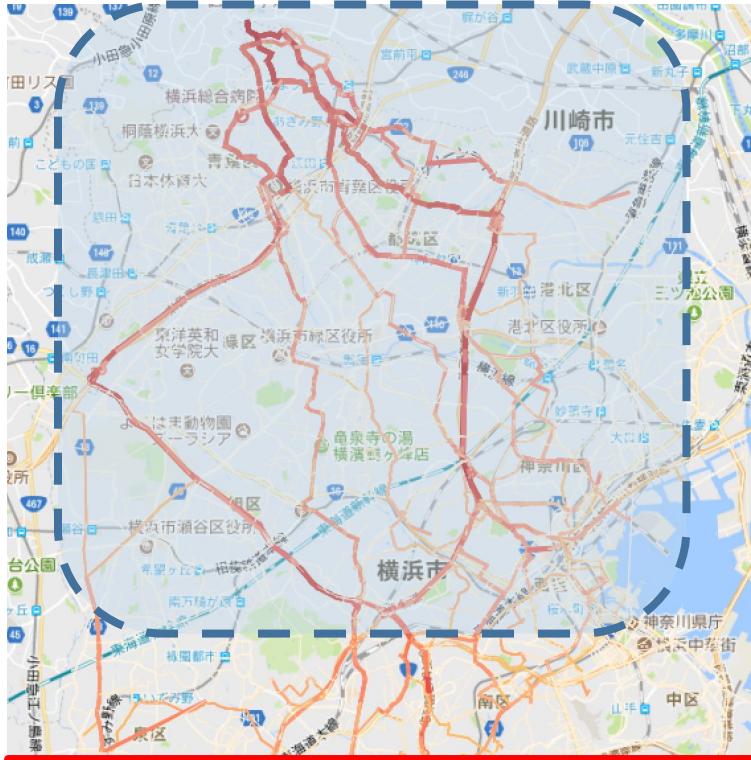

Congestion of the local streets mitigate

# Result

- Impact of Policy on a Whole Network

Congestion of the Highway **not** mitigate

# Summary

- Model
  - Mode Choice Model
  - Likelihood ratio **0.601**
  - Choices have a correlation
- Traffic Assignment
  - Construct Yokohama Network
  - We could Traffic Assignment!!!
  - Find Congested Route
- Simulation
  - Congestion of the local streets mitigate
  - Congestion of the Highway **not** mitigate
